EDUCATION

Btech in Computer Science(AI) 📅 2021-2025
Poornima College Of Engineering CGPA - 9.2

EXPERIENCE

Software Engineer

Consultadd Inc. 📅 09/2024 - present

- Designed and delivered hands-on technical training sessions for aspiring software engineers, covering core concepts of programming, data structures, algorithms, object-oriented design, and version control systems (e.g., Git).
- Delivered instructor-led training sessions on **Django (including Django REST Framework), Python**, and web application development to candidates.
- Collaborated with the internal development team on Django-based web applications as part of real-time training projects.

Full Stack Developer | Intern

Infonic Solutions 📅 07/2024 - 09/2024

- Led the development of a scalable Customer Relationship Management (CRM) system using Next.js, developed **server-side rendered (SSR)** pages with **Next.js** to optimize performance and SEO.
- Optimized data fetching in Next.js using **getServerSideProps** and **API routes**, improving load time.
- Designed and implemented **responsive, dynamic UI components** using **React Hooks, Context API, and Tailwind CSS**, enhancing user experience and system usability.

Full Stack Developer | Intern

Scarpbag Pvt. Ltd. 📅 10/2023 - 12/2023

- Spearheaded the development of the company's website using **React.js**, ensuring high performance and user-friendly interfaces.
- Led the backend development efforts for the organization's main applications utilizing **Node.js**, focusing on scalability and robustness.
- Played a major role in developing the backend of the **fleet application**, integrating critical functionalities and optimizing performance to meet operational needs.

React Developer | Intern

Netparam Technologies Pvt. Ltd. 📅 06/2023 - 09/2023

- Developed and maintained **single-page applications (SPAs)** using **React.js** and modern JavaScript (ES6+), focusing on performance and user experience.
- Integrated frontend with **Node.js/Express** backend APIs to enable seamless data communication and dynamic rendering.
- Designed **RESTful APIs** and handled data operations such as user authentication, **CRUD actions**, and session management.

PROJECTS

Events | Next Js | Tailwind CSS | Severless Actions | MongoDB

- Developed a full-stack web application for managing events, where users can **register/login, create events, and attend events**.
- Enabled authenticated users to create new events by providing comprehensive details such as event name, date, time, location, and description, leading to increase in user engagement.
- Enabled users to **post, edit, and delete events**, with real-time updates reflected on the frontend.

ChatVerse | React Js | Chakra UI | Redux | Node Js | Express | Socket | Prisma

- Developed a full-featured real-time chat application to facilitate seamless communication between users, with a focus on performance, scalability, and user experience.

Portfolio | Next Js | Tailwind CSS | Email JS

- Created and launched a fully responsive portfolio website with Next js, emphasizing theme customization and user experience; which resulted in increase in visitor engagement.

SKILLS

Languages: Java, JavaScript, TypeScript, Python, HTML5, CSS3.

Frameworks: React.js, Next.js, Node.js, Express.js, Tailwind CSS, Django.

Databases: NoSQL(MongoDB), SQL(MySQL and PostgreSQL), ORM's.

Tools/Technologies: Git, GitHub, Postman.
